

CURRICULUM VITAE

Richard John WATLING

Personal Details:

Contact: Box 2041, Government Buildings, Suva, Fiji
Tel:(679) 3383189;Fax: (679) 3381818;
Mobile (679) 9923189

Email: watling@connect.com.fj

Date of Birth: 13 November 1951

Place of Birth: Kampala, Uganda

Citizenship: Fiji

Country of Residence: Fiji.

Marital Status: Married (two children)

Key Areas of Experience:

Environment/Conservation Planning and
Management
Environmental Assessment
Conservation, Wildlife Management
Protected Area Management
Tropical Forest Ecology, Terrestrial Vertebrate Ecology
Island Ecology;
Mangrove Ecology and Management

Country Work Experience:

Fiji, American Samoa, Cook Islands, Kiribati, Papua New Guinea, Samoa, Solomon
Islands, Tonga, Tuvalu, Vanuatu,
Malaysia, Indonesia (Java, Bali, Sumatra, Kalimantan, Sulawesi), Cambodia, Lao PDR,
Galapagos Islands, Ecuador
Tanzania

Education:

1973-77 Ph.D. Dept. of Applied Biology, Univ. of Cambridge, UK.

1970-73 B.Sc. (Hons.) Zoology, Bristol University, England.

Additional Training.

- Environmental Auditor – ISO 14000. Quality College (Telarc), Auckland New Zealand.
- British Sub Aqua Club – Advanced Diver

Honorary Positions & Professional Associations:

1985 - 88 Research Associate of the Smithsonian Institution, Washington.

1986- Research Associate, Inst. of Applied Science, Univ. of the S. Pacific.

1977 - Scientific Fellow of the Zoological Society of London.

1982 - Fellow of the Cambridge Philosophical Society. (Life)

1977 - Member of the British Ornithologists' Club.

1994 - Fellow of the Environment Research Institute, University of Wollongong

1988 - 95 Editor, **Domodomo**, Journal of the Fiji Museum

1995- Member, Commission on National Parks and Protected Areas - IUCN, The
World Conservation Union.

1999-2009 BirdLife International – Affiliate (National Representative) for Fiji.

2007 Trustee – Fiji Nature Conservation Trust: NatureFiji-MareqetiViti

Websites: www.environmentfiji.com ; www.naturefiji.org

CV - Date of Revision: May 30th 2010

BIONOTE:

Dr. Dick Watling is Principal and Founder of Environmental Consultants Fiji Ltd., Fiji's sole specialist environmental consultancy practice. In this capacity his 19 years of consultancy experience encompasses a very broad range of environmental and conservation planning and management in Pacific Island Countries and South East Asia. He has worked for many of the significant multilateral agencies including the Asian Development Bank, the World Bank, FAO, UNEP, SPREP, SPC, UNOPS, UNDP, IUCN and the European Union.

Dr. Watling's specialist expertise in tropical forest and terrestrial vertebrate studies has formed the basis of extensive work experience in South East Asia in conservation and protected area management. In addition, this experience includes environmental policy formulation, environmental management guidelines and impact assessment of development projects. A resident of Fiji since childhood, Dr Watling is an internationally acknowledged authority on Fiji's environment, its birds and terrestrial wildlife. He has published five books and over 25 scientific papers.

In several Pacific Island Countries, Dr. Watling has been involved in wide-ranging capacity building for environmental management including policy formulation, environmental assessment guidelines, institutional strengthening and training programmes.

In his roles as Principal of Environment Consultants Fiji, an independent consultant and formerly as Environment Group Manager with T&T Konsult Sdn. Bhd., Malaysia, Dr. Watling has undertaken or managed a wide variety of studies for private, government, bilateral and multilateral clients. These include EIAs of mining, quarrying, logging, coastal resorts, marina, thermal power, industrial and road construction projects; natural resource surveys; environmental management and monitoring plans; environmental reviews and audits; environmental codes of conduct; emergency response plans, protected area management plans; ecotourism development studies; project formulation; project and proposal review and project management. Dr Watling is a lead assessor and trainer with SmartWood for forest management certification, with experience in Indonesia, Lao PDR, Papua New Guinea and Fiji.

In 2007, Dr Watling established the Fiji Nature Conservation Trust and acts as Trustee-Director for this membership-based organization which is rapidly establishing itself as Fiji's foremost local conservation organization.

EMPLOYMENT RECORD

From 1984 - present

Position Held : Founder and Principal of Environment Consultants (Fiji) Ltd

Description of Duties : Responsible for the provision of a specialist environmental service to Fiji's public and private sectors. Services have included a wide range of environment studies from faunal surveys to assessment of mining impacts; leading a team formulating Fiji's National Environment Strategy to advice on ecotourism development and training for coastal resorts. The practice is Fiji's sole specialist environmental planning service and has established a good working relationship with local architects and engineers to integrate the scoping and assessment of environmental issues associated with a wide variety of developments into project design and management.

From 1994 - 1996

Employer : Tonkin & Taylor International, Kuala Lumpur, Malaysia

Position Held : Consultant Environment Group Manager

Description of Duties : Manager of Tonkin & Taylor's Malaysian company - T&T Konsult Sdn. Bhd.'s Environment Group, responsible for management, marketing activities, client relations and provision of quality assurance, with specialist input in the ecological, natural resource management and impact assessment sectors.

From 1983 - 1984

Employer : Aqua Foods Fiji Ltd.,

Position Held : Manager

Description of Duties : Management of an eighteen month Pilot Project undertaking nutritional research to utilise locally available feed for cage culture of Tilapia. Preparation of a feasibility report for the shareholders.

Projects Commissioned and/or in Progress:

Fiji – Manager – Baseline studies in preparation for a new Tailings Storage Facility for Vatukoula Gold Mine Ltd.

Fiji – Manager – Waste management assistance to Fiji Fish Ltd. for effluent discharge permitting.

Fiji – Manager – EIAs of two quarries in the western division for Flametree Developments (Fiji) Ltd.

Fiji – Manager – Preparation of Tender Documents for the Naboro Landfill Operator

Fiji – Manager – EIA of the Coral Coast Inn, Korotogo. A development comprising a small number of self-contained units designed for people with disabilities, together with a large auditorium for cultural performances.

Vanuatu – Environment Specialist. US Millenium Challenge – Vanuatu Infrastructure Development Project. Environmental specialist attached to the office of the FIDIC Engineer to the project and responsible for reviewing all environmental reports and inspecting environmental measures undertaken by the contractor. Eleven months over three years.

Fiji – Environment Specialist. Environmental baseline work at the Nukudamu Copper Mine Prospect, Udu Point. Analysing lingering impacts in the wider environment of the mismanagement of the original mine which opened briefly in the 1960s. Commissioned by Matai Holdings.

Projects Completed:

These are divided into four categories:

1. Environmental Effects, Impact and Management;
2. Forestry;
3. Protected Area Management, Resource Surveys and Biodiversity; and,
4. Others – including Project Formulation and Reviews; Ecotourism; Training etc.

Environmental Impact and Management (Environmental Impact Assessment, Planning, Environmental Management Plans, Audits or Reviews)

2009 – Fiji – Manager. Environmental studies and EIA of bauxite extraction at Nawailevu, Bua. Commissioned or undertook 10 feasibility of baseline studies for the EIA of the project which includes a 30 ha mine site, a stockpile site, a quarry and a 600 m wharf. Duration 6 months over 2 years.

2009 – Fiji – Manager – EIA of the Outrigger Reef's foreshore development plans – a groyne and a small island on the fringing reef at the mouth of an occasionally flooding creek.

2009 – Fiji – Manager – EIA of the Pleass integrated water extraction and bottling factory, residential subdivision, organic farming and eco-tourism development at Nabukavesi, Namosi.

2009 – Fiji – Environment Specialist – ADB RSC-C91346 – Emergency Assistance Loan following the flooding on Viti Levu in January 2009. Duration – 0.5 months.

2009 – Fiji – Mangrove Specialist – Survey of the Rewa delta mangroves and associated areas to be impacted by proposed dredging of the Rewa River. Commissioned by the University of the South Pacific, Institute of Applied Science. Duration – 0.5 months.

2008-9 – Fiji – Environment Specialist. ADB 4764 Fiji – Renewable Power Sector Project. Responsible for preparing environmental and social assessments of proposed 150 km 132 kV Transmission Lines in line with ADB Safeguards Policy. Asian Development Bank.

2009 – Fiji – Manager. EIA of a low cost housing development, the Koroipita subdivision, Lautoka. Duration – 4 months.

2009 – Fiji – Manager. EIA of the the Navava subdivision, Salt Lake, Cakaudrove, Vanua Levu. Duration – 2.0 months.

2008 – Fiji – Environment Specialist – Environmental review of the resort for its owners in response to a legal challenge from the Native Land Trust Board, and on-going assistance to the resort owners and their legal advisers. Duration – 0.25 months.

2008 – Fiji – Manager – Technical review of soil report for Laucala Island and followed up by preparation of Laucala Island Quarantine Management Plan for the movement of plants to the island. Commissioned by Laucala Island Resorts Ltd. Duration 0.25 months.

2008 – Cook Islands – Environment Specialist – Review of environmental safeguards in the NZ Aid Water Supply Project for Mauke Island Community. Duration 0.5 months.

2008 – Cook Islands – Environment Specialist – Review of environmental issues relating to the upgrade of the Aitutaki Power Station. Duration – 0.25 months.

2008 – Fiji – Manager – ADB TA 4540. Social Survey for ADB Safeguard assessment for a loan to finalise the upgrading and tar-sealing of the Kings – Lodon Roads, Tailevu. Duration 0.5 months.

2008 – Fiji – Manager – Initial Environmental Assessment for a Feasibility Study on Hydropower Renewable Energy Development Project in the Wailoa River, Naitasiri. An IEE and Social Surveys of downstream villages and settlements. Commissioned by Tokyo Electric Power Services Co. Ltd. – 2.0 mmonths.

2008 – Fiji – Manager – EIA of the Cane Bay Subdivision, Vuda, Ba. Duration – 3 months.

2008 – Fiji – Environment Specialist – Preparation of an Environmental Management Plan for Agro-Processing Navua Ltd., an agricultural product processor and wholesaler. Duration – 0.25 months.

2008 – Fiji – Environment Specialist – Monthly Environmental Inspections of the construction of the Pacific Point development at Caudua, to evaluate compliance with the CEMP and to provide advice on progressive requirements. Jan 2008-March 2009.

2007 – Fiji – Environment Specialist – Environmental Management Plan for the construction of the Orchid Inn, Lautoka, Ba.

2007 – Fiji – Environment Specialist – Environmental review of the Gatward Dairy Farm, Tailevu for a potential purchaser. Duration – 0.25 months.

2007 – Fiji – Environment/Forestry Specialist – Feasibility of the establishment of energy wood crops for electricity generation plants of Fiji Sugar Corporation and other Independent Power Producers. Two man team commissioned by the European Union. Duration 1.5 months.

2007 – Fiji – Project Manager – EIA of jetty and boat ramp at Maui Bay Estate, Nadroga. EIA for a piled jetty and boat ramp in a sensitive marine setting. Coastal Processes and community consultation contributed to the assessment. Commissioned by Maui Bay Estate. Duration 1.0 months.

2007 – Fiji – Manager – EIA of the Vuda Quarry – an basalt quarry adjacent to the existing Emure Quarry; geological resource assessment, landowner and local community consultation. Duration – 2.0 mm.

2007 – Fiji – Project Manager – EIA of the Vunabaka Bay Resort, Malolo Island, Mamanuca Group. EIA of an integrated resort development with two small marinas and two external reclamations, with the creation of one sand island and creation of swimming areas. Specialist studies included – coastal processes, community consultation, fauna and flora, archaeological survey and marine baseline study. Commissioned by Vunabaka Bay Resort Fiji Ltd. Duration – 3.0 months.

2007 – Fiji – Project Manager – EIA of Phases 2-4 of the Pacific Point Integrated Resort Development at Caudua, Namosi. The EIA of Phase 1 – residential subdivision – was completed and approved in late 2006. The current EIA assesses the proposed foreshore reclamation, a marina and hotel refurbishment. Commissioned by Skyking Ltd. Duration – 2.0 months.

2004-7 – Fiji – Project Manager – Goodman Fielder International. Investigations and improvement of the wastewater from the chicken abattoir at Coloisuva including the design and supervision of a pilot project.

2006 – Fiji – Project Manager – EIA of the Sovi Bay Integrated Resort Development – a residential and hotel development on a greenfields site at Sovi Bay, Nadroga. Commissioned by Sovi Bay Limited. Duration – 3.0 months.

2006 – Fiji – Project Manager – EIA of the Vuda Villas Development – a small villa resort development. Commissioned by Wallaroo (Fiji) Limited. Duration – 2.0 months.

2006 – Tonga – Environment Specialist. ADB 4548 Tonga – Integrated Urban Development Project. Responsible for environmental management and assessment inputs in the preparation of the loan project and then undertaking environmental assessments of the proposed project activities. Asian Development Bank. Duration – 2 months

2006 – Fiji – Environment Specialist. ADB 4764 Fiji – Renewable Power Sector Project. Responsible for preparing environmental assessments of core and sub projects for the sector, and environmental reviews of recently completed projects and their EIAs. Asian Development Bank. Duration – 2 months

2006 – Fiji – Project Manager – EIA of the Naidiri Limestone Quarry at Malomalo, Nadroga. Commissioned by Matapo Ltd. Duration – 2 months

2006 – Fiji – Project Manager – EIA of the Naisosovu Island Development – an integrated resort and residential subdivision development with a marina and internal channel construction on Naisosovu Island, Sabeto River delta. Commissioned by RelCorp (Fiji) Ltd. Duration – 4.0 months.

2006 – Fiji – Project Manager – EIA of the Malolo Paradise Resort – an integrated resort development with offshore islands, marina and internal lagoon on Malolo Island, Mamanuca Group. Commissioned by Kemp Capital Ltd. Duration – 2.0 months.

2005 – Fiji – Project Manager – Report on Trade Waste issues for two Goodman Fielder International factories, in respect of the forthcoming Water & Sewerage Department's Trade Waste Policy. Duration – 0.25 months.

2005 – Fiji – Project Manager – EIA of the Nawi Island Resort – an exclusive resort with overwater villas, a marina and a managed residential community on Nawi Island, Savusavu. Commissioned by Nawi Island Fiji Ltd. Duration – 2.5 months. Duration – 2.5 months.

2005 – Fiji - Project Manager – EIA of the Sonaisali Resort Villas – a 25 residential villa complex adjoining the existing resort, with the planned construction of jetties and island coastal protection works. Commissioned by Sonaisali Villas Ltd. Duration – 2 months.

2005 – Fiji - Project Manager – EIA of the Laucala Island Resort Development – an exclusive resort development with a golf course, foreshore works, a jetty and island coastal protection works. Commissioned by Laucala Island Resort Ltd. Duration – 3 months.

2005 – Fiji – Environment Legislation and Management Specialist – ADB 4720 Capacity Building for Water & Sewerage Services. Duration – 5 months.

2005 – Fiji – Environment Specialist – Due Diligence Audit of the Hideaway Resort, Sigatoka for a potential purchaser – 0.25 months.

2004-2005 – Fiji – Project Manager – Revised Environmental Impact Assessment for the Natadola Marine Resort. A comprehensive EIA was prepared in 1998, but the project did not go ahead. It

revived in 2004 and a new EIA commissioned to include some new developments and the findings of the original EIA. Commissioned by Natadola Land Holdings.

2005 – Cook Islands – Environment Specialist in the Aitutaki Island Power Study. Commissioned by Clay Engineering Ltd. Duration – 0.5 months.

2005 – Fiji – Project Manager – EIA of the Mango Bay Resort at Namatakula on the Coral Coast of Viti Levu. Commissioned by Mango Bay Resort Ltd. Duration – 2 months.

2003-5 - Fiji - Project Manager - Naboro Project Landfill. Commissioned by the Ministry of Local Government, Housing, Squatter Settlement and Environment, with funding by the EU to assist in setting up the institutional structure - regulation, administration and management of the new Naboro Landfill. (Part time over 24 months).

2004 – Fiji – Project Manager – Social Impact Assessment of the Sabeto Quarry in western Viti Levu. Commissioned by Standard Concrete. Duration – 0.25 months.

2004-2005 – Fiji – Project Manager – Regional Environmental Assessment of the Studio City proposal for Yaqara, on the north coast of Viti Levu. The Yaqara Group has been working with the Government of Fiji for over seven years to drive the development of an audio-visual industry in Fiji. The audio visual industry includes the convergent media sectors of film, television, video, music and audio, computer software, e-commerce and telecommunications. The principal physical location of the industry is intended at the Yaqara Studio City where a suitable 2,200 ha site for a new town has been identified and a town plan prepared. Because of the regional implications of the project, a Regional EIA was required by the Government. Commissioned by the Yaqara Group. Duration – 6 months.

2004 – Fiji – Project Manager – EIA of the Likuliku Bay Resort on Malolo Island in the Mamanuca Island Group. A prestigious development with over-water bures and swimming pools on the fringing reef. Commissioned by New Line Investments Ltd. Duration – 3 months.

2004 – Fiji – Project Manager – EIA of the AquaWater Fiji mineral water bore and bottling plant. Commissioned by Crystal Clear Mineral Water Fiji Ltd. Duration – 2 months.

2004 – Fiji – Project Manager – EIA for the Aanuka Island Resort, Tokoriki Island. An offshore island resort in the sensitive Mamanuca Group. Commissioned by Reynella Ltd. Duration – 2 months.

2004 – Fiji – Environment Specialist. ADB 4270 Fiji – Capacity Building in Water and Sewerage System. Responsible for environmental legislation requirements, environmental management needs, structure and functions for the new Water & Sewerage Department, and implementation arrangements for new Environmental Management Bill. Asian Development Bank. Duration 4 months.

2004 – Fiji – Project Manager – EIA of the Wailotua Quarry for the upgrade construction of the ADB-funded Korovou-Lodoni Road. Commissioned by COVEC (Fiji) Ltd. Duration 1.5 months.

2003-2004 – Fiji – Project Manager – Environmental Impact Assessment of Nawaci Island Villa Estate, Savusavu. The proposed resort is situated on an offshore island and the development has accentuated social, engineering and marine development issues. Commissioned by Wavi Ltd. owners of the island. Duration – 2.0 months.

2003 - Fiji - Project Manager - Environmental Management Plan for the new Vuda Piggery. An EMP for a new 440 sow unit with over 4000 total stock, when completed, the largest in Fiji. Commissioned by Vuda Piggery Ltd.

2003 – Fiji – Environmental Site Assessment: Proposed Embassy Site, Prince's Rd., Tamavua, Suva with Tonkin & Taylor International, commissioned by the American Embassy, Suva.

2003 - Fiji - Project Manager - EIA of Waivou Creek Gravel Extraction for the upgrade construction of the ADB-funded Korovou-Lodoni Road. The first gravel extraction EIA in Fiji to examine sustainability issues. Commissioned by COVEC (Fiji) Ltd. Duration – 1.0 months.

2003 – Fiji – Project Manager – Fauna, Flora and Archaeological Site Survey of Yaukuve Island, Kadavu, and Community Consultation with Dravuni village, landowners of Yaukuve Island commissioned by Serendipity Hotels, developers of a proposed 5 star resort. Duration 1 week.

2003 - Fiji - Project Manager - Environmental Management Plan, Construction - Chicken-rearing Farm, Viwawa Rd., Navua and Broiler Chicken Farm, Navunivaivai, Nausori for Goodman Fielder International. Duration - 0.50 months

2003 – Fiji – Project Manager – Initial Environmental Examination of the proposed Namena Quarry for the upgrade construction of the ADB-funded Korovou-Lodoni Road. Commissioned by COVEC (Fiji) Ltd. Duration 1.5 months

2003 – Fiji – Environment Specialist - Environmental Impact Assessment of the proposed Lodoni Quarry for the upgrade construction of the ADB-funded Korovou-Lodoni Road. Commissioned by COVEC (Fiji) Ltd. Duration 1.5 months

2003 – Fiji – Environment Specialist – Environmental Impact Assessment, Nanuya North Resort on Nanuya Lailai Island, Yasawas. EIA of a small, 15 bure resort. Commissioned by West Side Water Sports, Lautoka.

2003 - Fiji - Environment Specialist - Review of environmental implications of proposed intensive (mechanised) sugar cane cultivation by the Tokatoka Sawaeke, Viseisei Village. Commissioned by the South Pacific Project Facility, Sydney. Duration 3 days.

2001- 2002 - Fiji - Project Manager. Environmental Impact Assessment – Taunovo Bay Resort, Deuba. The F\$175 million development is situated on Viti Levu's southern coast at Deuba and has plans for a Rosewood-managed 5 Star hotel, residential development, a public park and ancillary development. The proposal had accentuated social issues in respect of beach usage and public concern over loss of access. The EIA was commissioned by the developers and Environment Consultants Fiji assembled a team of six multidisciplinary specialists from Fiji and New Zealand. Duration - 3 months over 18 months.

2002 - Fiji - Environment Specialist. Environmental Management Plan, Construction - Chicken-breeding facility, Navua for Goodman Fielder International. Duration - 0.25 months

2002 – Fiji – Environment Specialist – Initial Environmental Examination – Raising the Spillway of the Monasavu Dam to improve the efficiency of the Monasavu Hydroelectric Scheme. Meritec Ltd - Fiji Electricity Authority. Duration – 0.5 months.

2002 - Fiji - Project Manager. Environmental Impact Assessment - Chicken-breeding facility, Navua for Goodman Fielder International. A straight-forward EIA made sensitive because of the close proximity of the Navua Municipal Water Borefield. Environment Consultants Fiji has assembled a team of three specialists to undertake the EIA. Duration - 1.5 months

2002 - Fiji - Project Manager. Social Impact Assessment - Naidiri Quarry, Nadroga. Environment Consultants Fiji is undertaking a stand alone SIA for Basic Industries as a component of a full EIA. The quarry is in a sensitive location, close to the cane railway line and a proposed tourist resort. Duration - 0.5 months.

2002 - Fiji - Environment Specialist - Environmental Management Strategy for the Taunovo Bay Resort. Commission consisted of operationalising a Sustainable Design Programme which the resort owners had drawn up for their resort. Duration 0.25 months.

2002 – Fiji – Environment Specialist – Environmental Management Plan for the Nasau quarry and Naiyali crusher for the Kings & Lodoni Road Upgrade Project. COVEC Ltd. Duration – 0.5 months.

2002 – Fiji – Environment Specialist – Environmental Impact Assessment of the Bounty Road Reclamation, Walu Bay, Suva. A 1.5 ha area of tidal flats and mangrove adjacent to the Walu Bay Industrial site. Duration – 1 month.

2001 – Fiji – Project Coordinator – Lami Landfill Study. Commissioned by the Native Land Trust Board to coordinate a study on the environmental impact of Suva's 50 year old landfill with a view to taking legal action. Duration – 1 month.

2001- Fiji – Environmental Monitoring Plans for the new Naboro Landfill and the decommissioned Lami, Nausori and Navua Dumps. European Commission, Hydroplan International. Duration – 1 month over 2 years.

2001 – Fiji – Environment Specialist –. Preliminary environmental studies for the Studio City Zone, an ambitious IT project to establish an Audio-visual Production Centre with concurrent residential, tourism and industrial facilities on Viti Levu's northern coast at Yaqara. Studies include project scoping, mangrove and foreshore assessment and terrestrial biodiversity assessment. Duration – 0.75 months.

2001- Fiji – Environmental Management Plan for the ADB-financed Fiji Road Upgrading Project 3 – Kings and Lodon roads. COVEC. Duration 0.5 months.

2001 – Fiji - Initial Environmental Examination of the Natadola Access Roads Project, Viti Levu. Roughton International. Duration – 0.25 months.

2000 – Fiji - Environment Specialist - Hydrogeological study and catchment management plan for the Yaqara Catchment, Viti Levu, including recommendations for environmental permitting of natural water bottling plant. Commissioned by Water Studies Pty. Ltd. for Government of Fiji. Duration – 0.25 months.

2000 – Fiji – Environment Specialist – Environmental Management Reviews. Retained by the Native Land Trust Board to undertake environmental management reviews of a variety of operations on leased land to report breaches of compliance with lease conditions. Operations include tourist resorts and the Emperor Gold Mine at Vatukoula. Duration – variable.

2000 – Fiji – Environment Specialist – Environmental Impact Assessment – Sanna Quarry, Vanua Levu. Preparation of an EIA for a temporary quarry to provide aggregate for highway upgrading. Standard Concrete Ltd. Duration – 1 month.

1999 – Fiji – Environment Specialist – ADB Suva-Nausori Water Supply & Sewerage Project. A review of environmental impacts of current operations including system operating data. Identification of relevant issues and impact assessments of a proposed project and sub-options. Preparation of an Initial Environmental Examination. Duration – 1 month.

1999 – Fiji – Environment Specialist – Initial Environmental Examination– ADB Third Road Upgrading Project-Fiji. Commissioned by Project Design Consultants, Roughton International, to evaluate environmental impacts associated with the road upgrading. Principle issues include social needs of villagers; river flooding and scouring; sourcing of aggregate – rivers and quarries; vulnerable ecology - mangroves and coastal protection. Duration – 5 weeks.

1998-9 – Fiji – Project Manager & EIA Specialist – EIA Natadola Marine Resort. The US\$200 million development is situated on Viti Levu's premier international class beach and has plans for four hotels, two marinas and ancillary development. The proposal has accentuated social issues in respect of the landowners and public concern over loss of access. The EIA was commissioned by the Government of Fiji and Environment Consultants Fiji assembled a team of ten multidisciplinary specialists from Fiji and New Zealand. Duration – 3 months.

1998-9 - Fiji - Project Manager & EIA Specialist – Environmental Impact Assessment – Fiji Hilton Malomalo Resort. A 300 room 5 star hotel situated on Viti Levu's coral coast being developed by 5 Star Holdings. The proposal represents Fiji's first high rise hotel in a rural setting, additional EIA issues focused on the marine environment, construction impacts and operational management. Duration – 2 months.

1998 – Fiji – Environment Specialist – Environmental Impact Assessment for the Raintree Lodge at Colo-i-Suva, Rewa, for Spruce Ltd. The proposed \$1million eco-tourist lodge is sited on the bank of an artificial lake used as minor water source for the Suva Municipal Supply – the EIA issues

focused on maintenance of water quality, construction impacts, and operational management practices. Duration – 3 weeks.

1998 – Fiji – Environment Specialist – Baseline Survey for the Nukudamu Copper-Zinc Mine at Udu, Vanua Levu. Undertook a reconnaissance visit to the mine site which was operational in the late 1960s and provided a report to the current license holders, on the prevailing environmental issues. Designed a Baseline Survey as a component of a full Environmental Impact Assessment. Duration - 1 week.

1998 – Fiji – Project Manager – Coastal Processes assessments with engineering and design recommendations for the proposed Korotogo Bypass and the Grand Pacific Hotel development, Suva. Duration – 1 week.

1998 – Fiji – Project Manager, Environment Specialist – Environmental Management Plan for the refurbishment of the Reef Hotel. The refurbishment of the 65 room to the 200 room Outrigger Reef Resort will see the demolition of most of the existing hotel complex and replacement by a combination of chalets and room blocks. The work includes the preparation of a Waste Management Strategy, an Environmental Management Plan (Construction), and an Environmental Impact Study for the International Finance Corporation (World Bank), one of the project's financiers. Duration - 3 months

1997 – South Pacific – Sole contractor - Environmental Management Guidelines for Small Tourist Hotels and Resorts. Commissioned by the Tourism Council of the South Pacific to prepare a review of appropriate environmental management guidelines for small South Pacific resorts and hotels and to develop this into a Conceptual Video Script for subsequent filming. Duration – 1.5 months.

1997 - Fiji – Project Manager & EIA Specialist – EIA of the Momi Bay Resort, Nadroga, Viti Levu, commissioned by the developer, Galleon Cove Ltd. A \$50 million tourist resort with 5 Star Hotel, over-water accomodation, 18 hole golf course and conference facilities. The project had accentuated marine and social issues and a requirement of the developer for an ecologically sensitive development and mode of operation. Duration - 3 months.

1996 - Malaysia - Environment Specialist - Environmental Screening Study for the Northport - Westport Highway and Bridge. The study involved identifying the environmental issues relevant to a proposed bridge over the Kelang River mouth and its link roads, one of which was through sensitive mangrove and estuarine habitats. The study was commissioned by HSS Integrated Sdn. Bhd. Duration 1.0 man months.

1996 - Malaysia - Environment Specialist - Environmental Screening Study of the Penang 3rd Crossing. The study involved identifying the environmental issues and rating the potential effects of 6 options comprising 3 alignments and a combination of bridges, immersed tube tunnel and reclaimed islands with and without LRT for a crossing of the Penang Channel. The study was commissioned by Mekar Idaman Sdn. Bhd. Duration 0.5 months.

1996 - Malaysia (Sarawak) - Environment Specialist - Preparation of an Environmental Management Plan for the contractor of the Bakun Access Road Package 5 From Batang Kemena to Tubau, Pembinaan Limbongan Setia Sdn. Bhd. Duration 0.75 months.

1996 - Cambodia - Environment Specialist - a broad review of the environmental implications of a UN rehabilitation project in Cambodia's northernmost province, Ratanakiri. The project focus was on roads and secondarily on irrigation projects. During the assessment, on the job training was provided for two junior staff of the Ministry of Environment. Duration 0.5 months.

1996 - Fiji - Environment Specialist - Feasibility Study of the Vanua Levu pine plantation resource for Fiji Pine Ltd. The environment component of the study focused on plantation site selection, review of environmental management systems and an assessment of the likely impacts of industrial harvesting and processing. Member of a seven person team of international specialists assembled by International Development Ireland Ltd. with European Union funding. Duration - 1 month.

1996 - Malaysia - Project Co-ordinator - Environmental Impact Assessment of Pulau Tioman Power Station plant up. The EIA was of a plant up of an existing 3 MW to an 8 MW distillate and medium fuel oil fired open-cycle generators. Additional works included the construction of a 175m jetty within a Marine Park. Significant issues were ambient air quality which required air dispersion modelling for NO_x and SO_x levels and determination of suitable stack heights; noise; risk assessment and construction impacts to sensitive marine habitats. Duration 5 man-months.

1996 - Malaysia - Project Manager - Preliminary Environmental Impact Assessment of proposed highway construction through the North Selangor Peat Swamp Forest, Selangor, for Konsortium Leburayah Pesisiran Barat Sdn. Bhd. The North Selangor Peat Swamp Forest is a wetland of international significance and the preliminary EIA focused on hydrological, biodiversity and forestry issues, which would be impacted by the construction of the proposed four-lane highway. Duration 3 man-months.

1996 - Malaysia - Project Co-ordinator - Emergency Response Plan (ERP), Sultan Iskandar Power Station, Johore for Tenaga Nasional Berhad. The ERP was undertaken in close association with Power Station staff and included the services of three specialists covering emergency response, environmental and health and safety disciplines. Duration 4 man-months.

1995/6 - Malaysia - Project Manager - Site screening of five sites for MNI Newsprint Sdn. Bhd's. proposed Newsprint Mill with an annual production of 300,000 tonnes. The sites, in three different States, were screened for a wide variety of environmental issues with the major foci on water supply for process water and associated effluent discharge. A preliminary transport logistics analysis was a component of the study. Duration 3 man-months.

1996 - Malaysia - Project Co-ordinator - Environmental Impact Assessment of Glugor Combined Cycle Power plant up. The EIA was of a plant up of an existing 138 MW Open Cycle Power Station to 360 MW Combined Cycle. The additional works included reclamation of adjacent sea frontage and construction of additional plant. Significant issues were ambient air quality which required air dispersion modelling for NO_x and SO_x, and determination of suitable stack heights; noise, thermal water discharge and social issues. Duration 5 man-months.

1995/6 - Malaysia - Project Manager & EIA Specialist - Environmental Impact Scoping Study of the 250 km West Coast Expressway for a private consortium. The works undertaken over a ten month period consisted of screening successive route options and advising the client of the environmental concerns and management requirements; liaising with regulatory authorities; making presentations and reporting.

1995 - Malaysia - Project Co-ordinator - Environmental Audit of the Sultan Salahuddin Abdul Aziz Power Station, Malaysia's largest power plant operated by Tenaga Nasional Berhad. The audit comprised three specialists, a lead auditor, an air quality specialist and an emergency response specialist and was the first environmental audit of a power station in Malaysia. The audit was undertaken in an ISO 14000 framework and was also reported using AuditPower auditing software. Duration 1 man-months.

1995 - Malaysia - Project Manager & EIA Specialist - Environmental Impact Assessment of a Strong Linerboard Manufacturing Plant for Amcor Malaysia Sdn. Bhd., in Negeri Sembilan. The US\$150 m. plant is to occupy a 50 ha site and is designed to produce 150,000 tonnes/annum of linerboard from recycled old corrugated cardboard. The plant is to use a proprietary Zero Liquid Discharge effluent technology and specific and significant issues included ambient air quality (addressed with dispersion modelling for NO_x and SO_x), solid waste disposal, traffic generation and noise. Duration 5 man-months.

1995 - Malaysia - Project Manager & EIA Specialist - Environmental Impact Assessment for a 2 x 30 MW Co-generation Plant for Tenaga Nasional Engineering Consultancy Sdn. Bhd., in Negeri Sembilan. The plant designed to provide electricity and steam to be provided to an Industrial Estate. Specific and significant issues included stack emissions (employed dispersion modelling), noise and liquid wastes. Duration 2 man-months.

1995 - Malaysia - Project Manager & EIA Specialist - Environmental Impact Assessment for a granite quarry and crusher for MTD Construction Sdn. Bhd., in Perak. The quarry with a design capacity of 20,000 tonnes per year of aggregate for road construction and road upgrading was located in sensitive rural setting. Specific and significant issues included air blast, operational noise (employed acoustical modelling), vibrations, traffic, environmental management and social concerns. Duration 6 man-months.

1995 - Malaysia - Project Manager - Environmental Scoping for the proposed route of the 40 km Dedicated Highway between Kuala Lumpur and Sepang for HSS Integrated Sdn. Bhd. The works undertaken consisted of scoping the chosen route option and advising the client of the environmental concerns and management requirements. Duration 0.5 months.

1995 - Malaysia - Project Co-ordinator - Environmental Impact Assessment of the District Cooling Water 30 MW Co-generation Plant, Bangsar for Tenaga Nasional Engineering Consultancy Sdn. Bhd. The plant will supply cooling water for high rise developments in the vicinity and electricity. Specific and significant issues included stack emissions (undertook ambient air quality dispersion modelling for NO_x and SO_x), noise, social concerns and liquid wastes. Duration 7man-months.

1995 - Malaysia - Project Co-ordinator - Stack dispersion modelling for a proposed plant up of a thermal power station in Penang, for Tenaga Nasional Research and Development, Sdn. Bhd. The assignment was undertaken to model ambient air quality for NO_x and SO_x and in doing so determine a suitable stack height. Duration 0.25 months.

1995 - Malaysia - Project Manager - Environmental Quality Management Programme for MTD Construction Sdn. Bhd. The Management Programme was designed as a component of MTD's tender for the laying of a 350 km natural gas pipeline. Duration 0.25 months.

1994/5 - Fiji - Project Manager - Environmental Audit of Shell Fiji's Vuda Point Oil Terminal. Environmental review of the terminal operation and its impacts on the adjacent reefs and the relationships between the terminal operation and the landowning community. Phase 1: Community perceptions - May 1994; Phase 2: Reef and foreshore marine survey - December 1994; Phase 3: Reef sediment sampling survey - February 1995; Phase 4: Terminal operation audit - May 1995; Phase 5 - Summary Report produced in an attractive and informative format designed for government officials and the general public. Duration 3 man months.

1994 - Malaysia - EIA specialist with responsibility for ecological, resource conservation and biodiversity issues, in an Asian Development Bank funded Technical Assistance to the Government of Malaysia, with consultants Tonkin & Taylor International Ltd. The objective of the consultancy was the preparation of detailed guidelines for EIAs of Key Sector projects including:

- water supply including groundwater development;
- dams and reservoirs;
- irrigation including drainage of wetlands;
- fisheries, including the construction of harbours and coastal aquaculture; and,
- power generation and transmission.

Duration – 2 months.

1994 - Fiji - EIA of a foreshore reclamation project for J.K.S. Holdings Ltd. at Savusavu, Vanua Levu. The three acre reclamation for a shipping facility to service the main wharf is in a sensitive location in one of the most attractive harbours in Fiji. The EIA considers site options, highly developed community issues, thermal activity, visual aesthetics, the marine environment and coastal processes. Studies commissioned for the EIA included a Site Masterplan; Reconnaissance Marine Survey, Coastal Processes Study and a Fijian Community Social Survey. Duration 3 man-months

1994 - Fiji - EIA of a Tax Free Zone Development Project for the Ministry of Commerce & Industry, Government of Fiji. A 40 acre logged over plantation site on the outskirts of Suva, is being developed with assistance from the European Community. The issues involve baseline

water quality monitoring, design specifications, industry type, neighbouring communities, wetlands and a historic site. Duration - 2 months

1994 - Tonga - Environment Specialist in a Technical Assistance Team assisting the Government of the Kingdom of Tonga formulate an Agricultural Development Project. The project comprised three components, an agricultural development strategy for the Niuas and 'Eau, provision on a country wide basis of post harvesting facilities and training, and export marketing facilities for agricultural products. The study focused on identifying environmental issues which needed to be integrated into project formulation. Important amongst these were institutional responsibilities and capacities for environmental management, roading impacts, pesticide usage, drinking water contamination, international and intranational quarantine and biodiversity issues on Niuafo'ou. Duration - One month.

1994 - Cook Islands - Environment Specialist in a Technical Assistance Team assisting the Cook Islands Government formulate an Agribusiness and Agro-Industry Development Project. The project sought to facilitate private sector investment and development in agribusiness and agro-industry. The environmental study focused on identifying issues which required incorporation into project formulation. A review of country wide environmental issues and environmental legislation was undertaken. Environmental management guidelines were drawn up for four case studies which represented likely development options. Duration - one month

1993 - Fiji - Tuvatu Gold Mining Project. Project Manager/Environment Specialist for an Environmental Impact Assessment of a 2,000 tonne/month oxidised ore gold mining project. Commissioned by Geopacific. The EIA focused on appropriate design and practice for the small open cast mine which is located in a visually conspicuous and topographically difficult terrain. Of specific significance was the design of an environmentally sound tailings disposal method and landowner community consultation. Duration - 3 months

1993 - Fiji - Beach water quality assessment. A review for the Sheraton Fiji Resort, Denarau of their beach water quality monitoring programme, an assessment of the issues involved and recommendations for future options.

1993 - Papua New Guinea - Team Leader, Environment Specialist. Project identification and design assignment for IUCN - the World Conservation Union, Switzerland. Undertook a preliminary regional environmental assessment of the Fly River Catchment in which is located the OK Tedi Copper Mine and the Porgera Gold Mine and preparation of a sustainable development project proposal for international donors. One and a half month duration.

1993 - Kiribati - Environment Specialist in a An Asian Development Bank Technical Assistance Team assisting the Government of Kiribati prepare an Integrated Development Plan for the Northern Line Islands (NLI). The plan seeks to identify appropriate development options for the small populations of the remote NLI, while the environment study focused on identifying issues which required incorporation into project formulation. Significant issues included the rich biodiversity heritage of Kirimati (some of the largest seabird nesting colonies in tropical waters); sustainable resource exploitation (bone fish as a tourist attraction and commercial harvesting of a variety of marine products); water quantity and quality; waste management; institutional capacity for environmental and wildlife management; quarantine issues and feral mammal control. 7 week assignment, January to March 1993.

1992 - Fiji - Project Manager/Environment Specialist in a three man team assessing the environmental impact of the proposed Korotogo Bypass on Viti Levu's coral coast, a popular tourist attraction. The EIA study was commissioned by the Ministry of Infrastructure and Public Utilities, Government of Fiji and focused on route options, social issues (noise disturbance, traffic reduction, rights of way), tourism values and wetland (mangrove) conservation. The EIA recommended a new route for the proposed Bypass. Duration 2.5 months

1990-92 - Fiji - Team Leader, IUCN Consultants, providing technical assistance to the Ministry of Housing and Urban Development, Government of Fiji's National Environmental Management

Planning Project, for the Asian Development Bank. The project consisted of an eight man multi-disciplinary team of international consultants together with 12 national resource personnel, reporting in the fields of environmental legislation, policy, education and institutions; pollution management and monitoring; public awareness and information and identification of ecologically sensitive areas. The project's first major document was the National State of the Environment Report' produced in an attractive format for widespread public circulation. The final document prepared was a National Environment Strategy for Fiji which was subsequently endorsed by the Fiji Government.

1991 - Fiji - Environment Specialist in a three person team undertaking an Assessment of Environmental Impact of proposed Mine Tailings disposal. The study focused on the constraints (physico-chemical and location options) of tailings disposal from a Tailings Reprocessing Project and was incorporated in the Feasibility Study of the Project. Specific issues investigated were those associated with the chemical nature of the tailings involved and how it may change over time; the feasibility of disposal in a wetland (mangrove) habitat and the rehabilitative requirements of the tailings for agricultural or other appropriate land use. Commissioned by Ranger Pacific Ltd., Vatukoula, Fiji. Duration - 2 months.

1991 - Cook Islands - Environment Specialist undertaking a Preliminary EIA of a financially troubled and controversial four-star hotel development being built on a 'fast-track' and 'turn-key' programme. The study examined inadequate design specifications and provided recommendations for certain issues which required specific environmental management and mitigation attention. Commissioned by the South Pacific Regional Environmental Programme for the Cook Islands Government. Duration - 1 month.

1989 - Fiji - Environmental Impact Assessment for the Vulani Resort Development, a proposed \$30 million, hotel, marina and golf course development. The site in a vulnerable deltaic location involved the reclamation of mangroves. The EIA was completed but not submitted as the development was abandoned by the developer, Cobweb International. Prepared in association with Barrett Fuller Partner, Wellington, New Zealand. Duration - 2 months.

1989 - Fiji - Project Manager/Environment Specialist for an Environmental Study commissioned by Paget Mining (Fiji) Ltd. A preliminary environmental, cultural and social impact assessment of a proposed dolomite mining operation on a forested outcrop in the Sigatoka Valley. The study focused on the values of the site's unique landscape qualities, its numerous historic sites and a community survey of the landowning and neighbouring villages. Duration - 3 weeks.

1989 - Fiji - Preparation of an Environmental Management Plan for the exclusive Vatulele Resort. The Plan, a requirement of the Department of the Environment, addressed specific management issues including the identification of terrestrial and marine sites of conservation significance; minimal site disturbance and appropriate landscaping; waste management including a wetland biological wastewater treatment system; visitor management to a site of historic and cultural significance; a survey of an underwater cave system, and acceptable diving and fishing practices. Duration - 3 weeks.

1989 - Fiji - Ecologist and Impact Assessment Specialist preparing an environmental effects and preliminary feasibility report on a proposal relating to the disposal of mine tailings in a coastal environment, for the Emperor Gold Mine, Vatukoula. Undertaken in association with Barrett Fuller Ptnrs., Wellington. Duration - 2 months.

1989 - Fiji - Environmental Impact Assessment. The Savusavu Marina, a F\$10 million marina, boat repair facility, hotel and canal-apartment proposal for Vanua Levu's second largest town by Kilowen (Fiji) Ltd. Duration - 1 month.

1989 - Fiji - Preparation of an Environmental Impact Assessment of the proposed Marina at Vuda Point, a \$1 million marina development in abandoned coastal borrow pits. Duration - 1 month.

1988 - Indonesia - As Environment Specialist for the Australian International Development Assistance Bureau, reviewed the environmental issues associated with the Bah Bolon Project, a

river training, irrigation and agricultural development project. The study focused on the impact of catchment degradation on the project; linkages between freshwater swamps planned for drainage and rivers; the project's downstream effects in the rivers and in the wetlands of the coastal fringe (mangroves and freshwater swamps) and an appraisal of environmental monitoring at the Inalum aluminium smelter on the project's boundary. Duration - 1.5 months.

1988 - Fiji - FAO's Fiji Forestry Sector Development Review. As Forest Ecologist/Environment Specialist prepared a report outlining current environmental and biodiversity issues affecting the sector; assessing the environmental impact of the sector development options and drawing up prescriptions and procedures for environmental protection and enhancement. Duration - one month.

1988-89 - Indonesia - Environment specialist in a World Bank Technical Assistance team (ANZDEC Consultants) formulating the 1989-1994, Five Year Plan for the Ministry of Transmigration, Government of Indonesia. Responsible for assessing the likely impacts of transmigration into new sites, minimising environmental degradation on existing settlements and reviewing current studies, to develop recommendations for inclusion into policy and the Five Year Programme. Duration - 3 months

1987 - Fiji - Wildlife Biologist/Forest Ecologist in a three person FAO consulting team which conducted an Environmental Impact Study of a proposed logging concession in the vulnerable Navua River catchment. Duration - 1.5 months.

1983 - Fiji - As Wildlife Biologist prepared a report for BP Southwest Pacific on the impact of a chip-logging proposal of Viti Levu's exotic pine plantations with specific reference to indigenous species and rare and endangered forms. Duration - 2 weeks

Forestry

2009 – Fiji – Mangrove Specialist – Survey of the Rewa delta mangroves and associated areas to be impacted by proposed dredging of the Rewa River. Commissioned by the University of the South Pacific, Institute of Applied Science. Duration – 0.5 months.

2006-8 – Fiji - Environment/Forestry Specialist – Member of the Fiji Certification Standards Working Group. Responsible for the drawing up and endorsement of Fijian Standards for Certification by the Forest Stewardship Council. On-going.

2007 – Fiji – Environment/Forestry Specialist – Feasibility of the establishment of energy wood crops for electricity generation plants of Fiji Sugar Corporation and other Independent Power Producers. Two man team commissioned by the European Union. Duration 1.5 months.

2007 – Fiji - Environment/Forestry Specialist – preparation of environmental layers for the development of the Natural Forest Inventory. Commissioned by the Department of Forests. Duration 0.5 months.

2007 – Fiji – Environment Specialist – Fiji Forest Policy formulation – member of the forestry-environment expert review group.

2005 – Fiji – Environment Specialist – Inspection of Raralevu Logging Concession with a report on the logging methods and areas of illegal logging. Commissioned by the Forestry Department. Duration: 0.25 months

2005 – Fiji – Team Leader. Fiji Hardwoods Ltd - Fijian-owned Mahogany Plantations - Forest Certification Assessment for SmartWood (Rainforest Alliance). Duration: 0.5 months

2003 - Laos - Team Leader. Savannakhet and Khammouane Provincial Forestry Village Units - Forest Certification Assessment for SmartWood. Duration: 0.5 months

2003 - Fiji - Inspection and Assessment of Illegal logging in the Drawa Forest Block, Wailevu, Cakaudrove. Commissioned by GTZ Forestry Programme. Duration - 0.25 months.

2003 - Fiji - Team Leader. Fiji Hardwoods Ltd - Fijian-owned Mahogany Plantations - Forest Certification Scoping for SmartWood. Duration: 0.25 months

2003 - Niue - Biodiversity Specialist - Review of the Draft Code of Logging Practice for Niue, with specific emphasis on the provisions for biodiversity conservation. Commissioned by GTZ-SPC Regional Forestry Programme. Duration - 1 day.

2003 - Samoa - Trainer - Presenter at a three day workshop on Forest Certification. Course commissioned by GTZ-SPC Regional Forestry Programme. Duration - 0.25 months.

2002 - Laos - Team Leader. Savannakhet and Khammouane Provincial Forestry Village Units - Forest Certification Scoping for SmartWood. Duration: 0.25 months

2002 - Pacific Regional - Trainer - Development of Training Capacity in Forest Certification, a joint EC – BMZ – DIFD project for ACP countries. Duration - 0.25 months.

2001 – Fiji – Trainer – Regional Training Course on FSC – Forest Certification for government and industry personnel. Held in Labasa, Vanua Levu with visits to the concession of Fiji Forest Industries. Course commissioned by GTZ-SPC Regional Forestry Programme and conducted by Smartwood. Duration – 0.2 months.

2001 – Papua New Guinea – Team Leader for Forest Management Certification Scoping Assessment of PNG-Canadian Hardwoods Ltd. Central Province, Papua New Guinea. SmartWood Programme Rainforest Alliance. Duration – 0.5 months.

2001 – Indonesia – Team Leader of a five man team for a Forest Management Certification Assessment of PT Austral Byna's 300,000 ha concession on the Barito River, Central Kalimantan. SmartWood Programme Rainforest Alliance. Duration – 1.0 months.

1996 - Fiji - Environment Specialist - Feasibility Study of the Vanua Levu pine plantation resource for Fiji Pine Ltd. The environment component of the study focused on plantation site selection, review of environmental management systems and an assessment of the likely impacts of industrial harvesting and processing. Member of a seven person team of international specialists assembled by International Development Ireland Ltd. with European Union funding. Duration - 1 month.

1995 - Indonesia - Sustainable Forest Management. Ecologist and Impact Assessment specialist in a five man international team commissioned by CIFOR (Centre for International Forestry Research, Bogor) to undertake the second test of five sets of criteria and indicators for the sustainable management of forests. The sets included those of the Rainforest Alliance (Smartwood); the Soil Association (Woodmark); the Lembaga Ecolabel Indonesia; the Initiative Tropenwald and the Dutch 'DBB' Working Group. The test consisted of an appraisal of the sets through team discussion, whilst being located within an active timber concession where specific issues could be tested in the forest. The principle objective being to test the practicality of the sets in the field and to identify a minimum set. March - April 1995. 1.5 months.

1994 - Fiji - Forest ecologist in a multidisciplinary team preparing a detailed proposal for multiple use of Fiji's last remaining large undisturbed forest area, the Sovi Basin. The proposal was commissioned by the Native Land Trust Board and the team assembled by the Maruia Society with funding from New Zealand Ministry of External Affairs. Duration 0.25 months.

1993/4 - Fiji - Environmental Planner/Forest Ecologist responsible for Forest Function identification and mapping. The assignment involved the development of an appropriate forest function classification using FORGIS, the GIS (Arc-DBase, ERDAS) of the National Natural Forest Inventory. During the preparation of the classification two workshops were organised and presented to the Department of Forestry and interested parties. Phase 1: 4 weeks, April 1993; Phase 2: 4 weeks November 1993.

1992 - Fiji - Forest Ecologist and Environment Specialist - resource person for a team from the Ministry of External Relations and Trade, reviewing financial and technical assistance by the New Zealand Government to Fiji's hardwood plantation programme. Duration - 0.5 months

1988 - Fiji - FAO's Fiji Forestry Sector Development Review. As Forest Ecologist/Environment Specialist prepared a report outlining current environmental and biodiversity issues affecting the sector; assessing the environmental impact of the sector development options and drawing up prescriptions and procedures for environmental protection and enhancement. Duration - one month.

1988 - Fiji - Mangrove Biologist. Preparation of 'State of the Art report on Mangroves in Fiji' for UNDP/UNESCO Regional Mangrove Project, New Delhi, India, (RAS/79/002). The report collated all published and available information on Fijian Mangroves and included a vegetation and zonation description; an estimate of areal extent; an account of tenural status and administrative framework; the current management issues, prospects and knowledge deficiencies. Duration - 1 week.

1987 - Fiji - Wildlife Biologist/Forest Ecologist in a three person FAO consulting team which conducted an Environmental Impact Study of a proposed logging concession in the vulnerable Navua River catchment. Duration - 1.5 months.

1985-86 - Fiji - As Mangrove Ecologist and advisor to the Ministry of Lands undertook a study on the issues confronting mangrove management in Fiji and then developed a management philosophy suited to the cultural and tenural conditions of the mangrove resource. Phase 1 of the project utilised the management concept in the drawing up of management plans for three major mangrove areas comprising about two thirds of the national resource. In Phase 2, management plans for two additional and critical localities were drawn up. Duration - 9 months.

1983 - Fiji - As Wildlife Biologist prepared a report for BP Southwest Pacific on the impact of a chip-logging proposal of Viti Levu's exotic pine plantations with specific reference to indigenous species and rare and endangered forms. Duration - 2 weeks

Protected Area Management, Resource Surveys and Biodiversity

2009 – Fiji – Mangrove Specialist – Survey of the Rewa delta mangroves and associated areas to be impacted by proposed dredging of the Rewa River. Commissioned by the University of the South Pacific, Institute of Applied Science. Duration – 0.5 months.

2009 – Fiji – Ornithologist – Survey of avifauna in areas potentially impacted by the Namosi Copper Mine – Naikorokoro, Vunisoco. Duration – 0.5 months.

2007 – Fiji – Project Manager – Marine Reserve Establishment for Turtle Island Resort, Yasawas, Ba. Preparation of a report and extensive community consultation, marine survey and coastal processes assessment for the owner of Turtle Island Resort. Duration – 3 man months.

2007 – Fiji – Ecologist – Fauna and flora survey of Wailagilala Atoll as a component of an Environmental Impact Assessment for a proposed resort. Duration – 0.25 months

2007 – Fiji – Ornithologist – Preparation of a report identifying the Important Bird Areas for the Kingdom of Tonga, for BirdLife International. Duration – 0.5 months

2007 – Fiji – Project Manager – Environmental Assessment of foreshore lease application for a permanent Marine Reserve by Turtle Island Lodge on Nanuyalevu Island, Yasawa island group.

2007– Fiji – Management Plan for the Sovi Basin Protected Area. The Sovi Basin is the last wilderness area on Viti Levu, comprising some 20,000 hectares of untouched, lowland rainforest. ECF's principal, Dick Watling has been commissioned by the National Trust of Fiji and Conservation International to lead the team drafting the Management Plan for this unique area. Duration – 2 months.

September 2006 – Fiji – Ecological Monitoring of Vatuira Island. Periodic ecological monitoring of Vatuira Island following the removal of rats from the island. An important component of this is training for young professionals and the landowning community. Commissioned by BirdLife International.

May 2006 – Fiji – Preparation of Management Plans for the Ravilevu and Tomaniivi Nature Reserves, two of Fiji's oldest protected areas for the Department of Forests. Commissioned by BirdLife International. Duration – 2 months.

2006 – Fiji – Preparation of a case study on the shark fishing industry in Fiji, a component of a large study being undertaken for the Western Pacific Regional Fisheries Management Council. Duration – 1 month.

2003 - Tropical Pacific - Review-discussion paper for the Secretariat of the Pacific Community on incidental mortality of seabirds as a result of fisheries operations in the waters of SPC member countries. Duration - 0.3 months

2003 - Tonga - Ornithologist - Survey of Late and Fonualei Islands, Vava'u, Tonga to investigate the success of the attempted translocation of the Critically Endangered Polynesian Megapode *Megapodius pritchardii* to these islands from Niuafu'ou in 1992-3. Assisted by a grant from the Van Tienhoven Foundation for International Nature Protection. Duration 0.5 months

2002 – Fiji – Ecologist - Preliminary Baseline Survey of the Terrestrial Vertebrate fauna of the Waivaka Catchment, Namosi, Viti Levu, a potential open-cast porphyric copper mine. Commissioned by the Nittetsu Mining Consultants Co. Ltd.

2002 International Environment Specialist – Desk Review – Assessing Linkages between Biodiversity Conservation and Poverty Alleviation. A desk review of 14 World Bank GEF projects. World Bank. World Bank. Duration – 0.75 months.

2001-3 -Tonga – Wildlife Ecologist and Protected Area Management Specialist – Biological Coordinator of Baseline Surveys and Rat Removal of Maninita and Taula Islands, Vava'u in preparation for wildlife sanctuary status and ecotourism development. Commissioned by Tourism Resource Consultants, Wellington, on behalf of New Zealand Overseas Development Administration. Duration – 3.0 months.

2001-2 – Lao PDR, Vietnam, Cambodia, Thailand – Review of Lower Mekong River Protected Area and their role in Economic Development. Protected Area Management Specialist and review coordinator for Lao PDR. An eight man core team of international specialists combining with national teams as determined by governments. Principal outputs include a Lessons Learned Paper, a National Review for each country and a Regional Review, leading to a regional contribution to the World Parks Congress in Durban, South Africa, Sept. 2002. The review is a joint ICEM, AusAid, Swiss DC, UNDP funded project with Technical Assistance being provided by IUCN, WWF and Birdlife International. Duration 2.5 months over 18 months.

1999 – Kiribati – Wildlife Ecologist and Protected Area Management Specialist – South Pacific Regional Environmental Programme. A review of the functioning of the Wildlife Conservation Unit on Kiritimati Island, Kiribati, survey of the seabird breeding colonies and design of a conservation management and capacity-raising project . Kiritimati is the home of eighteen species of breeding seabird and the colonies of four species are the largest in the world. The island is considered to be one, if not the most significant seabird breeding islands in the tropics.. Duration – 5 weeks.

1998 – Tuvalu – Wildlife Ecologist – Bird survey of the Funafuti Marine Conservation Area; training in identification and monitoring for staff; draw up monitoring and management prescriptions. Commissioned by SPREP for the South Pacific Biodiversity Conservation Programme.

1998 - Lao PDR - Project Coordinator - Social Action Plan for the Nakai Nam Theun Conservation Area. Responsible for coordinating, contributing to and the final production of a Social Action Plan by a four man international team. The Action Plan focuses on improved livelihoods and social services for the 4,500 inhabitants of the Nakai Nam Theun Conservation Area and is designed to conform with the World Bank's OD 4.20 – Indigenous Peoples. IUCN for the World Bank. Duration 1 month.

1998 – Lao PDR - Biodiversity-Protected Area Management Specialist – Nakai Nam Theun Conservation Area Phase 2 Activities - 1998. Review and design mission for the World Bank. Duration 0.75 months.

1997 – Fiji – Ecologist & Project Coordinator – Fiji's Biodiversity Strategy and Action Plan. Coordinating consultant with responsibility for advising the Project Steering Committee on the scope, contents and formulation procedures of the BSAP; the management of five Technical Group requirements; report writing to draft stage and advise on comments, consultation and finalisation of the BSAP. Contributed Technical Group 2 report 'Conservation Status of Fiji's Terrestrial Vertebrates'. Government of Fiji -UNDP. Duration 4 months over 18 months.

1997 - Fiji – Ecologist – Baseline survey of the terrestrial vertebrates of the Tuvatu Gold Mine Study Area for an Environmental Impact Assessment. Commissioned by the Institute of Applied Studies, University of the South Pacific. Duration 0.75 months.

1996 - 1997 - Lao PDR - Team Leader - Environmental and Social Action Plan for the Nakai Nam Theun Conservation Area. The study team drew up an integrated conservation and development plan for the 3,700 km² water catchment of a proposed hydropower dam. The catchment, a designated protected area, has great biodiversity value including populations of two recently described ungulates, the Saola and the Giant Muntjac, and is also home to approximately 4,500 inhabitants in discrete communities which have over 20 separate languages in three language groups. The IUCN Consultant Team of eight international and three Laos national consultants was fielded for a seven month period to undertake the World Bank commissioned assignment.

1996 - Cambodia - Protected Area Specialist - a review of the Draft Management Plan for the Preah Sihanouk NP prepared by the Ministry of the Environment and IUCN - the World Conservation Union, in order to assist in completing the document and providing UNDP's Environmental Technical Assistance Project with recommendations on funding priorities. Duration 0.5 months.

1992 - Fiji - Preparation of a management plan and action strategy for the Yadua Taba Island Reserve. The island, a sanctuary for the Crested Iguana *Brachylophus vitiensis* a large iguanid discovered in 1978, has been declared a sanctuary by the Fiji Government. The plan was drawn up over an eighteen month period enabling considered participation by the Fijian communities involved. The plan seeks to ensure long-term protection for the island and thus the iguana, as well as ensuring that the traditional owners of the island can benefit from the sanctuary. Commissioned by the World Wide Fund for Nature and the National Trust for Fiji. Duration - two months over a 15 month period.

1992 - Fiji - National Biodiversity Review. A review of the state of knowledge of Fiji's terrestrial biodiversity with a commentary on the status of legislation, protected areas and wildlife management. Commissioned by the South Pacific Regional Environmental Programme, Apia, Samoa. Duration - 1 month

1991 - Fiji - Management of the seabirds nesting on Vunivadra Island, Nadi Bay. A report for Aquila (Fiji) Ltd., the developers of a tourist resort. Duration - 1 week.

1991 - Fiji - Bouma Forest Park, Taveuni - Park Planner/Ecologist in a two man team drawing up a Management Plan for a landowner initiated and managed forest conservation project which was being funded by the New Zealand Government. Responsible for identifying biodiversity and conservation values of the proposed site and contributing to recommendations for an appropriate administrative structure for this ground-breaking project in Fiji. Duration - 1 month.

1990-91 - Indonesia - Fauna and habitat specialist in a World Bank Technical Assistance Consultant Team undertaking a project to upgrade management in five National Parks (Baluran-ljen-Alas Purwo, Bromo Tengger-Semeru, Bali Barat, Dumoga and Gunung Leuser). Consultants - New Zealand Government's Department of Conservation. Eight month input over two years.

1990 - Fiji - Terrestrial and marine biological resource survey for an Environmental Impact Assessment of the proposed Lakomai Resort, Malolo for Harrison & Grierson Consultants, Suva. Duration - 1 week.

1990 - Fiji - Terrestrial, marine and cultural resource survey for an Environmental Impact Assessment of the proposed Nautilus Resort, Nacula Island, Yasawa Group, for Kinhill Kacimawai (Fiji) Ltd. Duration - 1 week.

1989 - Fiji - Wildlife of the proposed Bua Rice Irrigation Project, Vanua Levu. A report for the Institute of Natural Resources, University of the South Pacific, Suva. Duration - 2 weeks.

1989 - Fiji - Fauna and Flora survey of Vomo Island commissioned by the Institute of Natural Resources, University of the South Pacific. Duration - 1 week.

1989 - Fiji - Management Plan for the Garrick Memorial Reserve for the National Trust for Fiji. A national project financed by the South Pacific Commission through the South Pacific Regional Environment Program. The 1,000 acre Garrick Reserve is Fiji's most important conservation area for lowland and foothill tropical moist forest. Duration - 1 month

1986 - Fiji - Wildlife Biologist/Forest Ecologist. Undertook a forest and fauna survey of Naitauba Island for its owners, the Johanine Daist Communion, as a base line study for the future development of the island. A plan was prepared with recommendations for conservation zoning and management. Duration - 1 week

1983 - Fiji - As Forest Ecologist and Park Planner for Fawcett, Wilton & Bell Ltd. contributed to a major report on the development of Vaturu Dam, commissioned by the Ministry of Public Works. The plan envisaged a combination of tourism and protection of the forested catchment to provide an inland tourism and recreation attraction which would enable the landowners to receive a financial return whilst ensuring catchment protection for a sustained water supply. Duration - 2 months.

1981 - Indonesia - As Wildlife Biologist with a World Wildlife Fund team undertook a survey of the Kayan-Mentarang Reserve, East Kalimantan. A plan was prepared to modify extensively the boundaries to exclude on-going developments, incorporate regional requirements and include special forest ecotypes. Duration - 6 weeks.

1978-81 - Project Leader - World Wildlife Fund Project 1526: Lore Lindu National Park, Central Sulawesi, Indonesia. Duties included:

- Assisting the Indonesian Conservation Authorities on Reserve Identification, Planning and Management.
- Training the National Park Guard Force.
- Initiating a Public Awareness and Conservation Education Programme.
- Ecological research on some of Sulawesi's endemic fauna to identify conservation needs.
- Reporting on Timber Concession practices and watershed management.

For nine months responsible for the WWF Dumoga-Bone Project in North Sulawesi, and had coordinating responsibility for Operation Drake's exploration and research in Morowali, Central Sulawesi. Following which a Management Plan for the Morowali National Park was drawn up. Duration - 3.5 years.

Others – including Project Formulation and Reviews; Ecotourism etc

2009 – Fiji – Preparation of Tender Documents for the Extension of the Naboro Landfill, Rewa.

2009 – Fiji, Solomons & Papua New Guinea – Preparation of a report “National CITES-related legislation and its impact on opportunities for native floriculture”. ACIAR

2008 – Fiji – JICA Waste Minimization and Recycling Promotion Project – undertaking Community, Recycling and Composting Surveys. Duration 1.5 mmonths

2007 – Fiji – Environment Specialist – Due diligence review of three undeveloped properties in the Yasawa Group for an international consortium investing in a land bank. Duration – 0.25 months.

2007 – Fiji – Preparation of a review report on bird strike hazard at Nadi and Nausori Airfields with an assessment of training needs. Commissioned by Airports (Fiji) Ltd. Duration – 0.25 months.

2007 – Vanuatu – Preparation of a report on bird strike hazard at three Vanuatu airfields – Bauerfield (Efate); Whitegrass (Tanna) and Pekoa (Santo). Commissioned by Airports Vanuatu Ltd. Duration – 0.5 months.
